

This is the print version of the [Skeptical Science](#) article '[CO2 measurements are suspect](#)', which can be found at the URL <http://is.gd/dDRIB>.

How reliable are CO2 measurements?

What The Science Says:

CO2 levels are measured by hundreds of stations across the globe, all reporting the same trend.

Climate Myth: CO2 measurements are suspect

"The Keeling curve, which is widely used to show the increase in CO2 emissions, is based on data from the top of Mount Mauna Loa in Hawaii. Mauna Loa is a volcano and it doesn't seem to me that a volcano is the best place to be taking CO2 measurements" ([disinter](#))

Skeptical Science explains the science of global warming and examines climate misinformation through the lens of peer-reviewed research. The website won the Australian Museum 2011 Eureka Prize for the Advancement of Climate Change Knowledge. Members of the Skeptical Science team have authored peer-reviewed papers, a [college textbook on climate change](#) and the book [Climate Change Denial: Heads in the Sand](#). Skeptical Science content has been used in university courses, textbooks, government reports on climate change, television documentaries and numerous books.
